

Power RADIO

Product Highlights

Power RADIO brings the power and flexibility of graphical radio control to integrated and standalone workstations. The rich feature set is backed by a non-blocking design, with redundancy and transparent switchover.

Power RADIO interfaces directly with any manufacturer's conventional radio system, and most manufacturers' trunked radio systems via RF control stations.

- Graphical user interface
- Configurable multi-page screens
- Seven different shifts with dynamic reconfiguration
- Console intercom with group and all-call
- Individual channel volume control for each operator
- Digital level controls adjustable via software
- Optional radio paging
- Auxiliary control relays and inputs
- Tone, E&M, contact closure and DC current keying radio control
- Radio ANI compatible
- Call queuing for both radio and telephone
- Instant transmit
- Multi-select and multi-format paging
- Alarm screen with diagnostics
