

Evergreen

Technology Refresh Programs

Systems today offer a wealth of information and communication with technology playing an increasingly essential role in your PSAP.

Maximizing the return on your investment is a fundamental need. Software and hardware maintenance programs help you address this need with ease and peace of mind.

Positron's Evergreen program offers comprehensive software maintenance, hardware maintenance and technology refresh programs for the products you already own, or are planning to acquire.

Evergreen

Program Highlights

Evergreen provides a cost-effective way to manage your technology spending and maximize your return on investment. Evergreen has a proven history of delivering value and can be tailored to provide flexible levels of protection for a variety of scenarios. Simply choose the right combination of software, hardware and technology refresh packages to suit your needs.

- Take advantage of new or enhanced features and functionality as they become available
- Get continued support beyond the original warranty period
- Cost-effectively adapt to evolving public safety requirements, such as new wireless technologies
- Take advantage of platform evolution as the operating environment evolves
- Access online resources such as remote training services and up-to-date electronic documentation
- Benefit from the predictability of annual fees to plan your technology spending more accurately over the life of your system
- Benefit from newer hardware when required by software upgrades with technology refresh
